

NoteM8[®]

NoteM8 is revolutionizing the way law enforcement officers work in the field. Don't go on patrol without it! NoteM8, created by Presynct Technologies, is specifically designed for iOS & Android devices.

HOW IT WORKS

Those reports are stored locally or sent back to the enterprise Presynct Report Network for approval or rejection by supervisors.

The NoteM8 Reporting Automation application allows police officers to create reports in the field with attachments such as videos, photos, voice, etc.

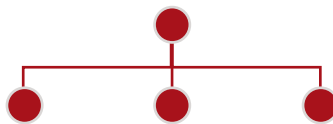

All finalized reports are then converted to a PDF for storage.

COMPONENTS

Forms Designer

Have the ability to make design changes on the go. The forms will be downloaded directly from the phone or tablet.

Presynct Report Network

This optional upgrade includes workflow (officer/supervisor approval/rejection), creation of reports through a web-browser, email distribution and advanced searching.

NoteM8 Application

Use NoteM8 to create reports, take pictures and attach images and easily search and retrieve reports.
